Mr. Dwight R Foster  
Ultra One Corporation  
112 East Ave., Unit # 8  
Hackettstown, New Jersey 07840

Dear Mr. Foster:

Thank you for demonstrating and explaining the numerous applications the Ultra One Heavy Duty & G5 degreasers can perform throughout my entire restaurant. My staff and myself were totally impressed to say the least with your demonstration, when I asked you if your Lincoln tunnel cleaners could degrease my floors better than our company's Kay chemical products in front of our chicken ovens, you certainly blew them all away degreasing a floor we could not cut the grease on and get clean with any of our present company products. My staff and I were totally impressed on how well you degreased the red terracotta tile floor in front of the chicken ovens and also in the rear kitchen in front of the sinks and the cooking stations.

The most unbelievable demonstration of the Ultra One cleaning products was when you cleaned all the deep black carbon stains out of the carving station counter top created by the cook trays being slid over the white counter top cutting board at the carving station which we have tried everything under the sun to clean with, and nothing has ever worked to remove the black stains. I also need to remark that the white counter top cutting board is now ten shades whiter where you cleaned the black carbon stains off compared to the off white or yellow color on the rest of the counter top section that we thought was the real color of the counter top originally. Everywhere you spot cleaned around the restaurant now stands out like a sore thumb in a night and day appearance of being clean.

We are also impressed with the no fumes given off any sort in either one of your Ultra One cleaners when being used, plus your products also deodorized as they cleaned. I have also never seen a product work this good that you could also put your hands in and not be affected by it at all. Thanks for showing us a great product that I wish we could get, I will pass it along to regional and see if we would be permitted to use it where we cannot get our present cleaners to work at all in our restaurant, thanks again for the demonstration.
